Zoom

Dear Zoom Hiring Team,

What excites me most is helping a business do what it didn't think it could. That's what draws me to the Head of Infrastructure and Employee Services role at Zoom, and in particular its mandate to run Zoom on Zoom, with IT as Customer Zero for the products and AI and automation keeping employees productive.

At Ripple, I started with four project managers who couldn't keep up with customer demand. That team grew into a global organization, and the result I point to is that banks could go live on RippleNet in eight weeks instead of eight months. Along the way we built programs and tools that met customer needs without continually adding headcount.

Today I lead Engineering Infrastructure & Internal Services at SingleStore with the same mindset. I give people clear direction, build what the business needs, and change course when a better opportunity shows up. I'll retire a structure I built the day it stops paying for itself. Our internal development platform cut infrastructure bottlenecks by 70%, and I run our internal GenAI program, from Claude Code to negotiating LLM token pricing.

I led a $20M program across multiple sites and vendors, and I delivered more than $2M in cost efficiencies at a multinational software company.

My organization today is 32 people, and at Ripple I led 25 project managers, plus 75+ engineers and architects indirectly, across four regions. I haven't owned IAM, endpoint management, SRE, or NIST, SOX and SOC compliance, so I'd put strong specialists in charge there and own the outcome, as I do with my principal architects today.

I'd like to hear where you want to take Zoom and talk about how I can help you get there faster.

Best,

Casey Caster
