Agility Robotics

Dear Agility Robotics Hiring Team,

What excites me most is helping a business do what it didn't think it could. That's what draws me to the Vice President, Strategic Program Management Office role at Agility Robotics, and in particular the step from early Digit deployments to a factory built for 10,000 robots a year, which only works if every launch program runs with the same discipline.

At Ripple, I started with four project managers who couldn't keep up with customer demand. That team grew into a global organization, and the result I point to is that banks could go live on RippleNet in eight weeks instead of eight months, as the network grew past 200 members. Along the way we built programs and tools that met customer needs without continually adding headcount.

Today I lead Engineering Infrastructure & Internal Services at SingleStore with the same mindset. I give people clear direction, build what the business needs, and change course when a better opportunity shows up. I'll retire a structure I built the day it stops paying for itself. When a strategic partner program was falling apart, I stepped in and led it to successful delivery, and it now brings in more than $30M in recurring ARR.

The pattern holds at other scales. I led a $20M program across multiple sites and vendors, and I delivered more than $2M in cost efficiencies at a multinational software company.

I'd like to hear where you want to take Agility Robotics and talk about how I can help you get there faster.

Best,

Casey Caster
