Hiring Manager
Agility Robotics

Dear Hiring Manager,

I am interested in the Vice President, Strategic Program Management Office opportunity at Agility Robotics. As an experienced software executive, I bring a broad background in building program management functions, global delivery, engineering operations, and executive governance. What excites me about this role is the chance to build a program office from the ground up, work directly with the COO, and help shape how the company plans and delivers as it scales.

I currently lead Internal Services and Technical Program Management at SingleStore as chief of staff to the CTO, where I rescued a failing strategic partner integration that brought in more than $30M in recurring ARR.

Selected achievements from earlier in my career include:

- Built Ripple's global implementation function from 3 project managers to 25, plus 75+ engineers and architects, delivering 800+ implementations and cutting delivery time from eight months to eight weeks.
- Delivered a $20M+ digital transformation program at Wells Fargo with more than 300 testers.
- Led continuous improvement at Autodesk, analyzing 150+ projects and delivering more than $2M in savings.

Collaboration is central to how I lead. I build strong relationships with executives, engineering teams, and vendors, and work to bring technical and business priorities together.

At Agility Robotics, I would establish the program office's operating rhythm, hire and develop technical program managers, and give the COO and executive team a clear view of portfolio health and tradeoffs. I have not led hardware product launches, so I would partner closely with your engineering, manufacturing, supply chain, and quality leaders.

I would welcome the opportunity to discuss how my experience and leadership approach align with your priorities for this role. Thank you for your consideration.

Best,

Casey Caster
