Workiva

Dear Workiva Hiring Team,

What excites me most is helping a business do what it didn't think it could. That's what draws me to the Vice President of Product and Technology PMO role at Workiva: making planning and delivery across Product & Technology predictable enough that leaders can commit to bigger bets as Workiva grows beyond $1B in ARR.

At Ripple, I started with four project managers who couldn't keep up with customer demand. That team grew into a global organization, and the result I point to is that banks could go live on RippleNet in eight weeks instead of eight months, as the network grew past 200 members.

Today I lead Engineering Infrastructure & Internal Services at SingleStore with the same mindset. As chief of staff to the CPO and then the CTO, I lead technical program management, run engineering capacity planning and delivery dashboards, and led the technical side of our M&A integration. I give people clear direction, build what the business needs, and change course when a better opportunity shows up. I'll retire a structure I built the day it stops paying for itself. When a strategic partner program was falling apart, I stepped in and led it to successful delivery, and it now brings in more than $30M in recurring ARR. I also lead our AI tooling across the development stack, including Claude Code, which is where I'd take PMO tooling next.

The pattern holds at other scales. I led a $20M program across multiple sites and vendors, and I delivered more than $2M in cost efficiencies at a multinational software company.

I'd like to hear where you want to take Workiva and talk about how I can help you get there faster.

Best,

Casey Caster
